**SAREMCO**

Why choose Simplified Universal Composite?

3 shades cover 90% of daily cases

A streamlined shade concept designed to match up to 90% of VITA classical shades reliably.

Universal indication

Designed for anterior and posterior restorations – simple, efficient, and clinically reliable.

Intelligent esthetic adaptation

Engineered to harmonize naturally with surrounding tooth structure for confident esthetic results.

Reduced inventory, less waste

Fewer shades mean simplified stock management, less reordering, and fewer expired materials.

Product Specification

Advanced micro-hybrid composite | Light-curing | 130 MPa flexural strength | Highly filled 76%wt | Radiopaque
Cavity classes (I–V) | Anterior and posterior | Consistent aesthetic results
